Plasdecor, por qué ????

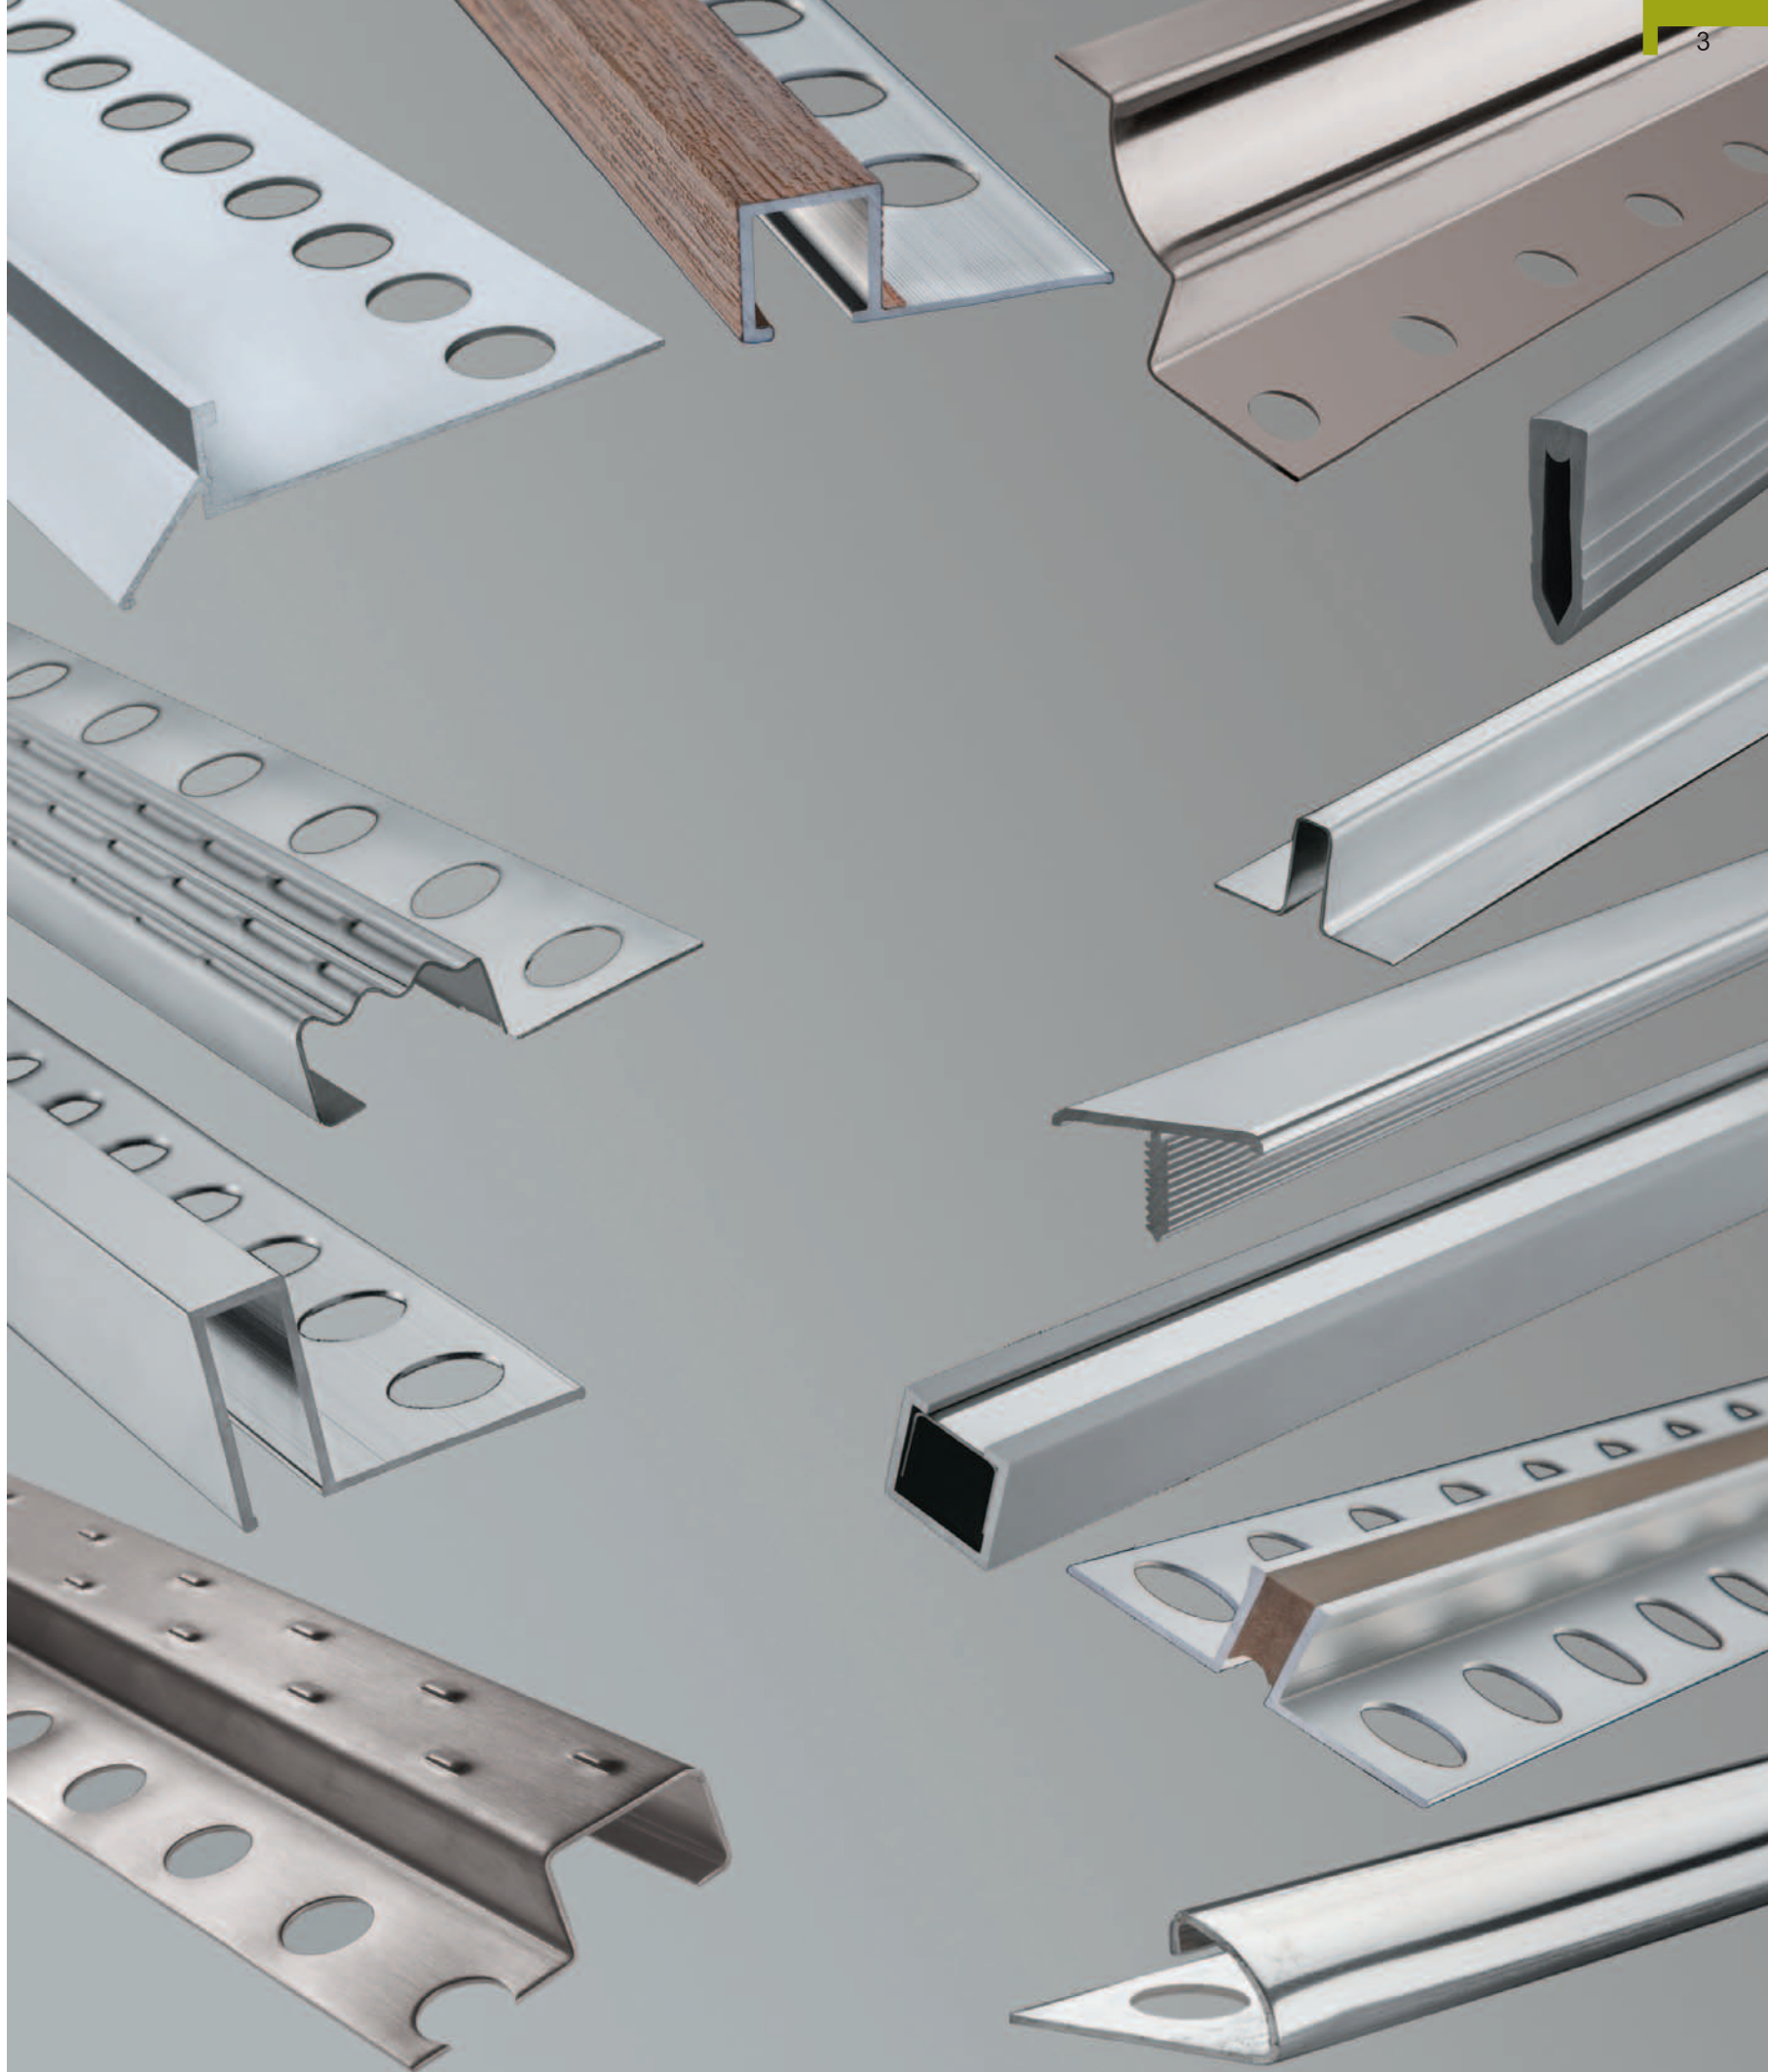

Porque...

- estamos en el mercado **más de 25 años**
- nuestra marca significa **servicio, innovación y calidad**
- **producimos** más de 500 referencias
- **nuestro equipo** está comprometido para su servicio

Plasdecor, why ????

Because...

- we are in the market from **more than 20 years**
- our brand involves **service, innovation and quality**
- **we produce** more than 500 references
- **our team** is committed to your service

ESPECIFICACIONES TÉCNICAS **_TECHNICAL SPECIFICATIONS**

ALUMINIO

Los perfiles y listelos de aluminio de Plasdecor son producidos utilizando la aleación de aluminio 6063, aluminio de altas prestaciones que lo convierte en un material idóneo para la extrusión. Sus propiedades le confieren ligereza, con gran maleabilidad y resistencia a la corrosión. Los productos realizados con esta aleación son no inflamables.

La aleación 6063 es especial para el anodizado, otorgándole en este proceso características de dureza superficial, protección frente a la oxidación y durabilidad del color. El proceso de lacado además de preservar el aspecto y las características del aluminio, mejora su estética y la protege de los agentes externos.

ACERO AISI 304

Este acero forma parte de la serie de los 300 en los que están incluidos un amplio grupo de las aleaciones de austenítico de cromo-níquel. Sus propiedades lo han convertido en un acero básico por ser uno de los más usados. Es el grupo de aceros con mayores prestaciones desde el punto de vista de fabricación de componentes y equipos, así como de comportamiento en servicio. Tienen propiedades de conformación excelentes, muy buena soldabilidad y gran resistencia a los distintos tipos de corrosión

ALUMINIUM

The profiles and listels of aluminum of Plasdecor are produced using aluminium alloy 6063, high performance aluminium that makes it an ideal material for extrusion. Its properties confer lightness, with great malleability and resistance to corrosion. The products made with this alloy are non-flammable. The alloy 6063 is special for anodizing, giving in this process characteristics of surface hardness, protection against oxidation and durability of color. The lacquering process in addition to preserving the appearance and characteristics of aluminium, improves its aesthetics and protects it from external agents.

STEEL AISI 304

This steel is part of a 300 series in which a large group of chromium-nickel austenitic alloys are included. Its properties have made it a basic steel because it is one of the most used. It is the group of steels with the highest performance from the point of view of manufacture of components and equipment, as well as of behavior in service. They have excellent conformation properties, very good weldability and great resistance to different types of corrosion.

CONSEJOS DE COLOCACIÓN **_PLACEMENT ADVICES**

Nuestros perfiles y listelos metálicos vienen protegidos, en su inmensa mayoría, por un film. Este no debe retirarse hasta finalizada su colocación y limpieza. De no hacerse así, las piezas deben ser limpiadas de cualquier resto de obra (cementos, colas, etc.) con un paño suave y húmedo tal como se colocan, sin esperar a que ningún producto extraño se seque encima de nuestros perfiles.

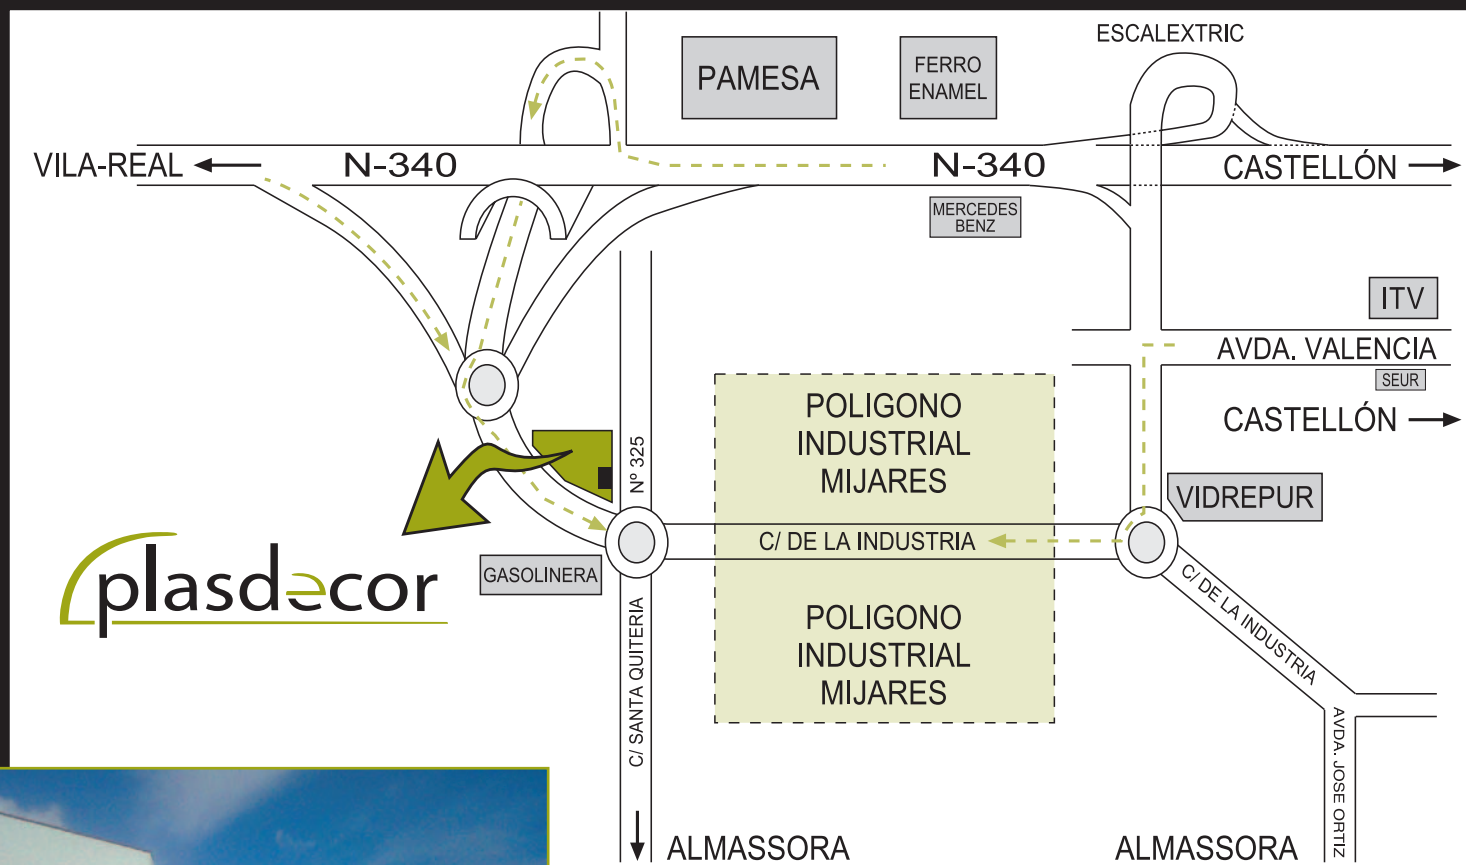

Durante el desempaquetado y extracción de las piezas de las cajas se recomienda abrirlas totalmente con cuidado de no dañarlas. Posteriormente las piezas no deben ser arrastradas unas sobre otras para evitar que se produzca cualquier arañazo.

Our profiles and metal listels are protected, in the vast majority, by a film. This should not be removed until the installation and cleaning is completed. If this is not the case, the parts must be cleaned from any other work (cements, glues, etc.) with a soft, damp cloth as they are placed, without waiting for any foreign product to dry on top of our profiles.

When unpacking and removing the pieces from the cartons, it is recommended to open them completely, taking care not to damage them. The pieces must not be dragged over each other to prevent any scratching.

plasdecor @

Desde hace 25 años nos dedicamos al mundo de los perfiles y complementos para la cerámica y la construcción, en aluminio, acero y PVC. Nacimos como una pequeña empresa familiar y queremos seguir gestionándola asegurando su continuidad, creciendo de forma positiva para la compañía y para nuestros clientes.

Queremos consolidarnos como marca referente en el mercado tanto nacional como internacional. Continuar mejorando día a día, reforzando la satisfacción de nuestros clientes.

Servicio: disponemos de un amplio stock y un servicio logístico que, junto con nuestra gran capacidad de producción, aseguran en todo momento el cumplimiento de sus requisitos y expectativas de nuestros clientes.

Fiabilidad: todo el personal de nuestra organización está involucrado en la consecución de nuestros objetivos y capacitados para conseguir la máxima satisfacción de nuestros clientes. Únicamente trabajamos con los mejores proveedores y materiales. Nuestra organización utiliza la metodología de evaluación de riesgos de los procesos para prevenir las posibles desviaciones o no conformidades del Sistema de Gestión de la Calidad.

Innovación: nuestros productos están en constante actualización y evolución para hacerlos más competitivos.

Cercanía: estamos en contacto continuo con nuestros clientes, y su satisfacción es nuestra motivación para continuar día a día con nuestro proyecto.

Por ello se compromete a:

- Contar en todo momento con personal altamente cualificado e implicado con los objetivos de Plasdecor.
- Cumplir la legislación y reglamentación aplicable en todas nuestras actividades.
- La mejora continua de los procesos de Plasdecor y de la eficacia de su sistema de gestión de calidad.
- Fidelizar a los clientes actuales y promover la captación de otros nuevos.

Para la aplicación activa de esta política es absolutamente necesario el apoyo tanto de la Dirección como de toda la plantilla, así como de proveedores y clientes.

Our Company has been working for 25 years in making aluminium, steel and plastic profiles and complements for ceramic tiles and building. We were born as a small family company and we would like to continue managing it in the future, trying to grow as a company and for our clients.

We want our mark to be quality reference both for national and international market. We want to improve day by day, making our clients more and more satisfied.

Service: we have a large stock and a logistical service that, along with our great production capacity, assure, at all times, the fulfillment of its requirements and the expectations of our customers.

Reliability: all the staff of our organization is involved in the achievement of our objectives and trained to achieve the maximum satisfaction of our clients. We only work with the best suppliers and materials. Our organization uses the risk assessment methodology of the processes to prevent possible deviations or nonconformities of the Quality Management System.

Innovation: our products are constantly submitted to revisions and improvements to make them more competitive.

Closeness: we are in continuous contact with our customers, and their satisfaction is our motivation to continue day by day with our project.

For this reason, we are involved into:

- Counting on a highly qualified staff involved with the objectives of Plasdecor in every moment.
- Accomplishing the legislation and regulations in all our activities.
- The continuous improvement of Plasdecor processes and the effectiveness of its quality management system.
- Encouraging the current customer's loyalty and promoting the acquisition of new ones.

For the active implementation of this policy is absolutely necessary the support of both the management and staff, as well as suppliers and customers.
